

ADAPTED JOURNALS NOTES

- There are 3 fall items listed, but only two journals. This is on purpose. This way students can have a choice about which 2 pieces of fall items they want to write about!
- Students can brainstorm their own graphic organizer facts or they can use the cut and paste images included to fill out the organizer.
- On the picture support page, use a marker or a crayon to color the circles the corresponding color. This allows this product to be black and white, printer friendly!
- There are tracing supports for students who cannot write but can trace. Cut and paste supports are also available for students who benefit from gluing sentences in order! Students can also write their own stories related to the topic.
- There is room for students to draw a picture. There are also pictures they can choose to paste into the box and color.

FALL ITEMS GRAPHIC ORGANIZER #1
